Experience

Student Developer **Budapest, Hungary**
Ericsson, @BNEW SAN, CodeChecker *July 2024 – Current*

- Contributed upstream to LLVM's Clang Static Analyzer by enhancing C/C++ memory-error diagnostics warnings across test and documentation.
- Delivered OAuth integration with (Google, Microsoft, GitHub), meeting Ericsson's security and compliance requirements.
- Implemented automatic generation of databases along with creation of new products in CodeChecker.
- Extended documentation with updated procedures.

Intern **Budapest, Hungary**
Ericsson, @BNEW SAN, CodeChecker *February 2023 – July 2024*

- Started the implementation of OAuth for (GitHub, Google, Microsoft)

Projects

Company: Ericsson

OAuth2 implementation in CodeChecker *Sep 2024 – May 2025*

- Integrated OAuth standard with Microsoft, Google and Github authentication in CodeChecker.
- Provided protection against data interception during OAuth login flow.
- BFF architecture was used for implementation.
- Project is available here: https://github.com/Ericsson/codechecker

Budget Tracking Application *June 2023 – July 2023*

- Developed an online application for tracking spending and income from various sources.
- Implemented with Laravel for both front-end and back-end to ensure a full-stack solution.
- Project is available here: https://github.com/feyruzb/budget_tracker

Neptun TOTP *August 2023 – September 2023*

- Contributed to both the coding and design aspects, ensuring a user-friendly interface while maintaining robust security measures.
- Project is available here: https://chromewebstore.google.com/detail/neptuntotp/dncomboebhigjfgpjebdeiapjeheibjd
